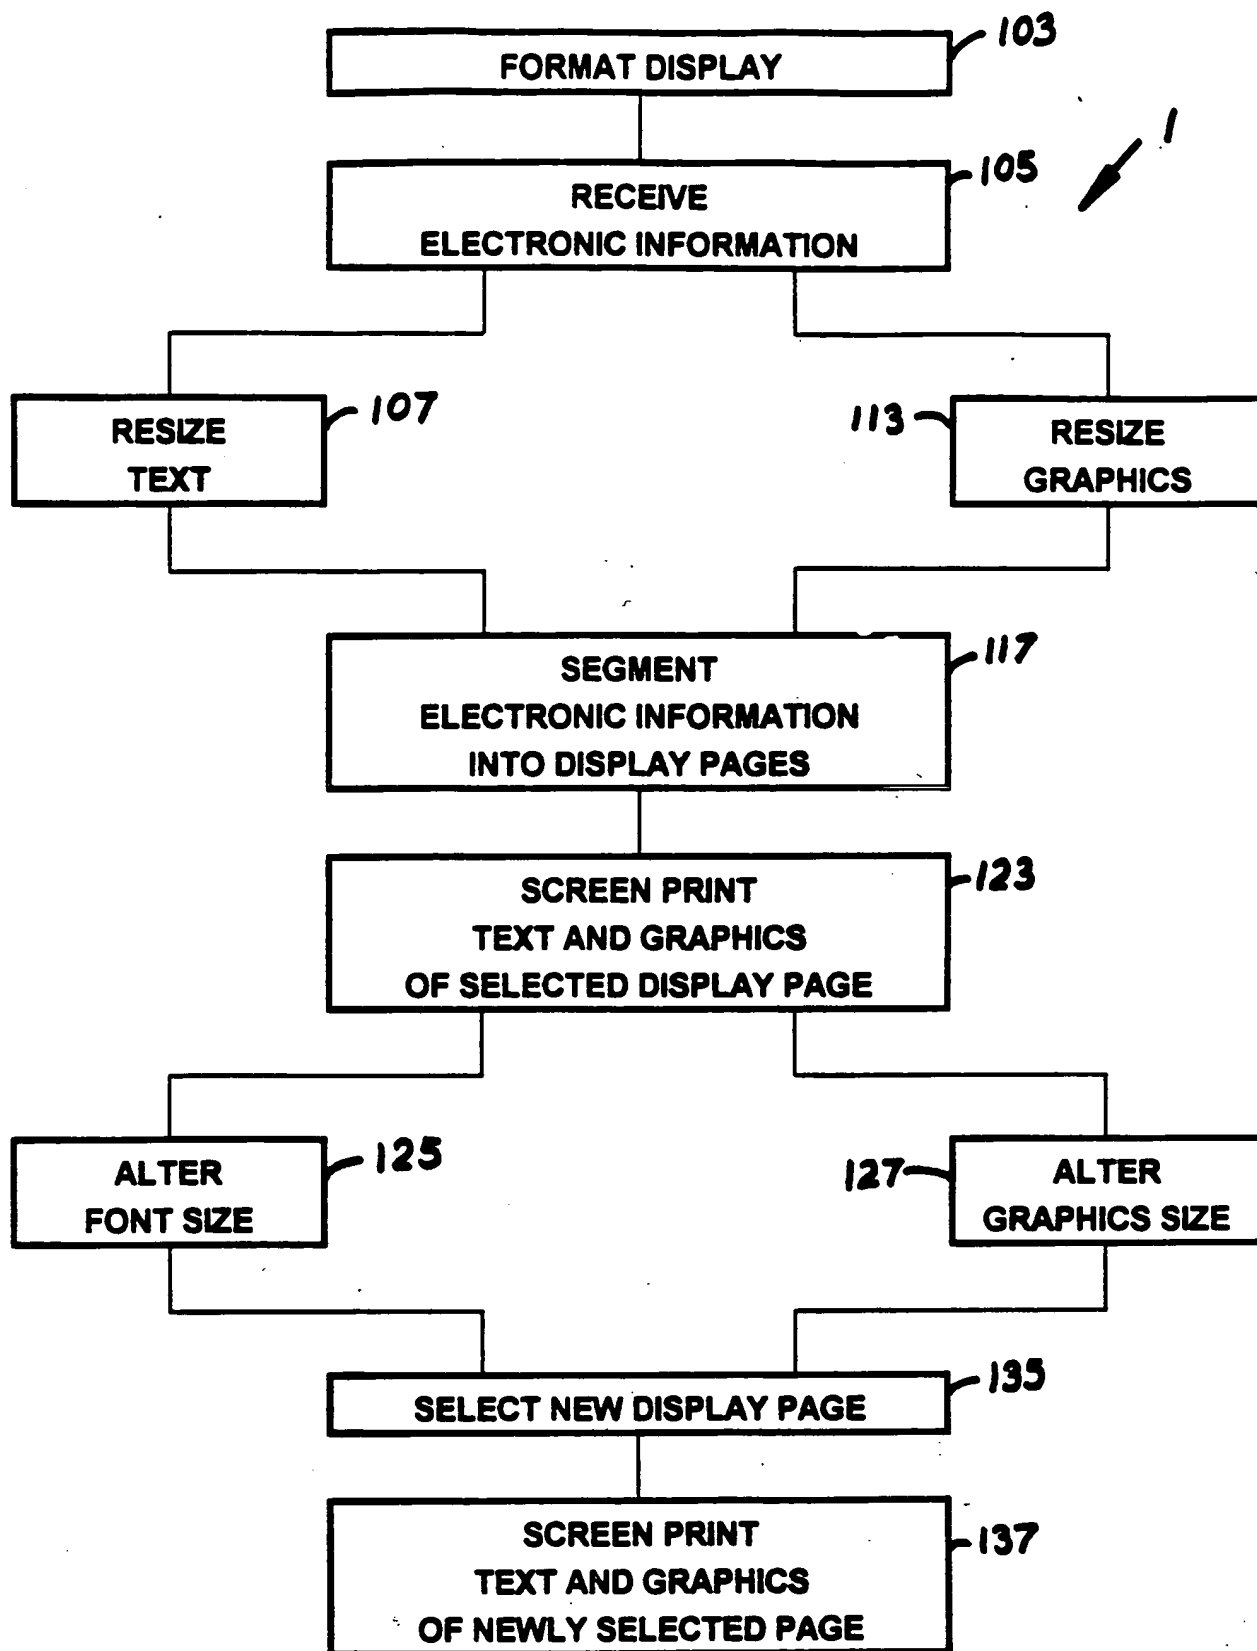

FIG. 3

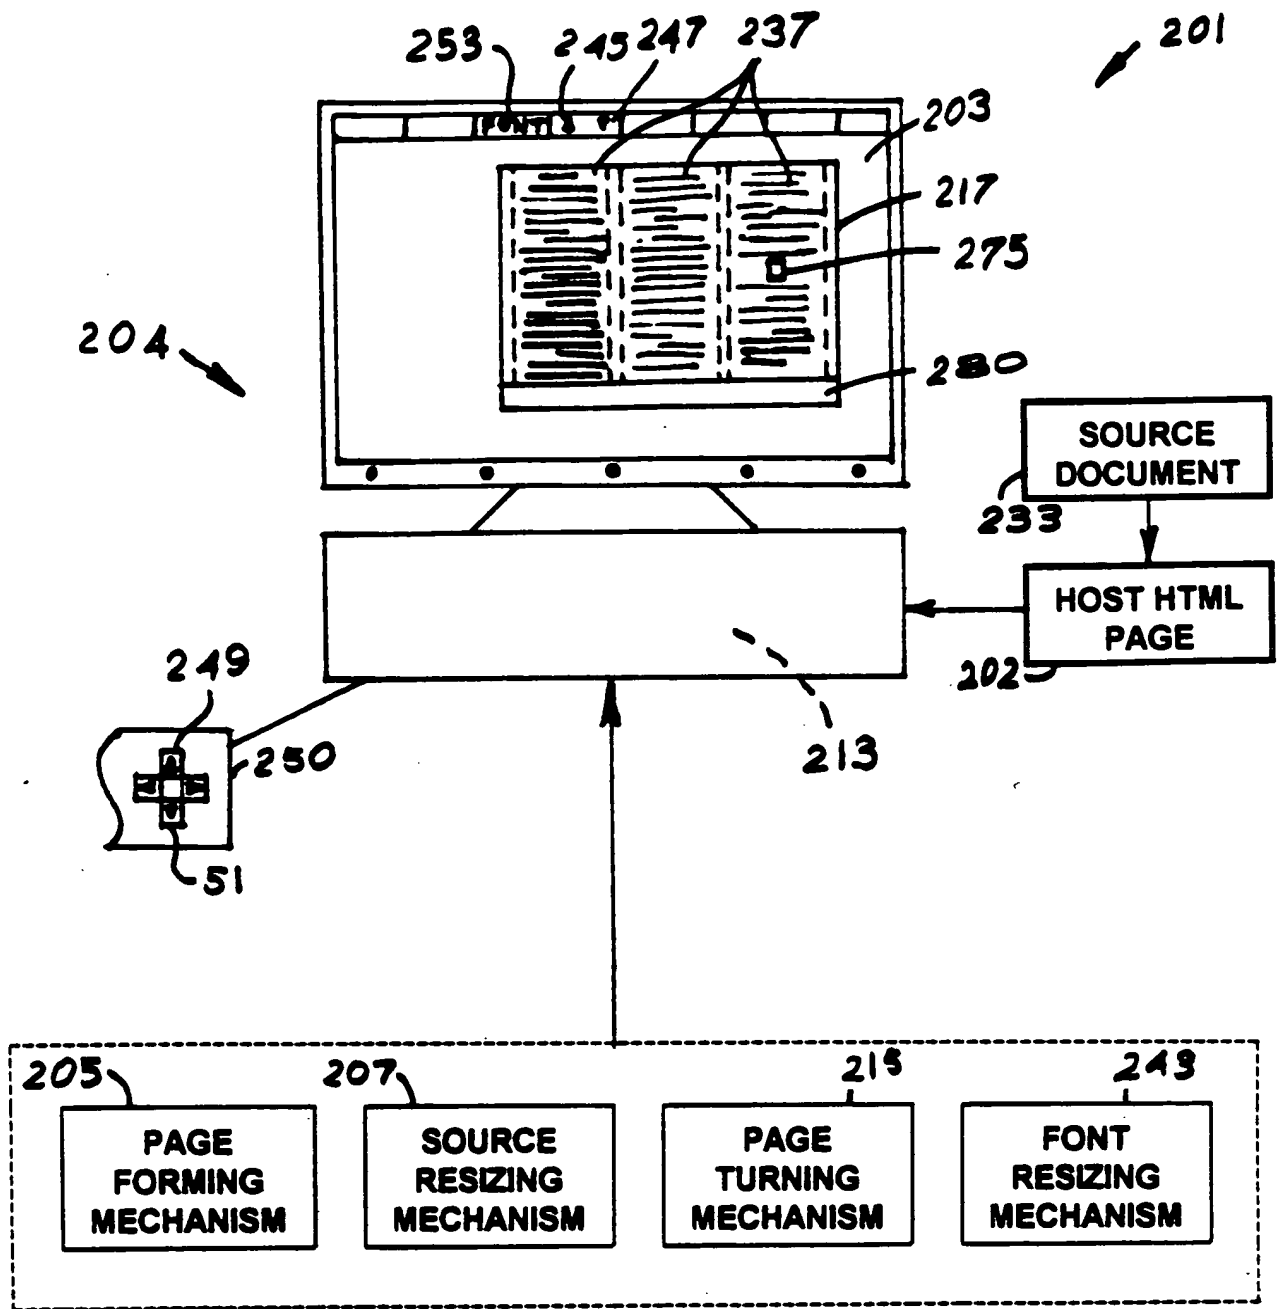

FIG. 4

The diagram illustrates a page forming system. A vertical stack of mechanisms is shown, with a horizontal 'SCREEN PAGE' (227) connected to the 'SCREEN PAGE FORMATING MECHANISM' (223). The vertical stack consists of the following mechanisms from top to bottom: 'PAGE FORMING MECHANISM' (205), 'SCREEN PAGE FORMATING MECHANISM' (223), 'COLUMN FORMATTING MECHANISM' (235), 'DISPLAY PAGE FORMATTING MECHANISM' (225), 'SOURCE RESIZING MECHANISM' (263), 'IMAGE RESIZING MECHANISM' (265), 'TABLE RESIZING MECHANISM' (267), and 'CONTENT FORMATTER MECHANISM' (262). To the right of the vertical stack, a vertical dashed line represents a page layout, with a bracket (257) grouping the top three sections (205, 223, 235) and another bracket (259) grouping the bottom three sections (265, 267, 262). The middle section (225) is connected to a horizontal dashed line (255) which is part of the page layout.
